BeltVue Online Portal Unit #1473

#SWSBV24231-002A

Equipment As Follows:

This dynamic product brings modern-day technology to industrial-based operations that weigh via belt scales, including mining, Aggregate, and Scarp Recycling sites (among others). Our comprehensive software package gives your business the ability to track measurements of your entire belt scale network through a single dashboard, while giving the access to a wide range of high-power extras:

- Live graphic views of your scale data
- Customizable alerts/notifications for various types of situations
- Simplified data exporting (with flexibility for data-specific analysis)
- 24/7/365 monitoring for integrity/ status of your belt scale

BeltVue was designed and developed exclusively with the end-user specifically in mind. This commanding platform has been engineered to deliver seamlessly on both middle and desktop devices. Ensuring that with BeltVue your data will be readily available regardless of where you are.
