

## Winter Maintenance

Winter is the ideal time to get ahead of maintenance. Our service team offers complete crusher inspections and screen rebuilds to identify performance issues before the busy season starts. Customers can benefit from improved performance, longer component life, and a smoother, more reliable start-up when the busy season begins.

**Schedule your winter inspection today to minimize downtime and maximize uptime when it matters most.**

### SCREEN MAINTENANCE

Our service technicians perform detailed inspections of screen decks, bearings, shafts, and tensioning systems, addressing wear before it becomes a breakdown.

### CRUSHER MAINTENANCE

For cone crushers, we evaluate liner wear, check head and bowl seating surfaces, verify lubrication and hydraulic systems, and make needed adjustments or component replacements.
